

THE  
PHILOSOPHICAL MAGAZINE

EDITOR

PROFESSOR N. F. MOTT, M.A., D.Sc., F.R.S.

EDITORIAL BOARD

SIR LAWRENCE BRAGG, O.B.E., M.C., M.A., D.Sc., F.R.S.

SIR GEORGE THOMSON, M.A., D.Sc., F.R.S.

PROFESSOR A. M. TYNDALL, C.B.E., D.Sc., F.R.S.

---

VOL. XLIV.—SEVENTH SERIES

JANUARY—DECEMBER 1953

---

LONDON:

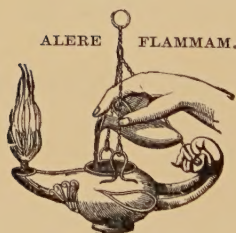

TAYLOR & FRANCIS, LTD., RED LION COURT, FLEET STREET, E.C.4.

“Meditationis est perscrutari occulta; contemplationis est admirari perspicua....Admiratio generat quæstionem, quæstio investigationem, investigatio inventionem.”—*Hugo de S. Victore.*

---

—“Cur spirent venti, cur terra dehiscat,  
Cur mare turgescat, pelago cur tantus amaror,  
Cur caput obscura Phœbus furrugine condât,  
Quid toties diros cogat flagrare cometas,  
Quid pariat nubes, veniant cur fulmina cœlo,  
Quo micet igne Iris, superos quis conciat orbes  
Tam vario motu.”

*J. B. Pinelli ad Mazonium.*

# CONTENTS OF VOL. XLIV. (Nos. 348-359)

## (SEVENTH SERIES)

Q1  
P5

### NUMBER 348—JANUARY

Page

I. Diffusion Problems Associated with the Growth of Crystals from Dilute Solution. By ALFRED SEEGER, H. H. Wills Physical Laboratory, University of Bristol.....	1
II. Further Observations on the Helium II Film by an Optical Method. By L. C. JACKSON and D. G. HENSHAW, H. H. Wills Physical Laboratory, University of Bristol.....	14
III. The Polarization Fields and the Resonance Frequencies of the Alkali Halide Crystals. By Sir K. S. KRISHNAN, F.R.S. and S. K. ROY, National Physical Laboratory of India, New Delhi.....	19
IV. The Nuclear Spins and Magnetic Moments of $^{24}\text{Na}$ , $^{42}\text{K}$ , $^{86}\text{Rb}$ , $^{131}\text{Cs}$ and $^{134}\text{Cs}$ . By E. H. BELLAMY and K. F. SMITH, Cavendish Laboratory, Cambridge.....	33
V. The Use of Neutron Counters to Obtain Cloud-Chamber Photographs of $V$ -Particle Decays. By K. H. BARKER, R. D. SARD and M. G. SOWERBY, The Physical Laboratories, University of Manchester....	46
VI. A Theoretical Examination of the Plastic Deformation of Crystals by Glide. By J. F. W. BISHOP, H. H. Wills Physical Laboratory, University of Bristol and Mechanical Engineering Research Organisation, D.S.I.R. ....	51
VII. Second Neighbour Interaction in Regular Binary Assemblies. By G. M. BELL, The Clarendon Laboratory, Oxford.....	65
VIII. The Interaction of Negative $\mu$ -Mesons with Uranium Nuclei. By W. GALBRAITH and W. J. WHITEHOUSE, Atomic Energy Research Establishment, Harwell, Berks.....	77
IX. The Production of $\tau$ -Mesons in Ice. By A. J. HERZ, P. E. HODGSON and R. M. TENNENT, Imperial College of Science and Technology, London, S.W.7.....	85
X. The Interaction of Dislocations and Boundaries. By A. K. HEAD, H. H. Wills Physical Laboratory, University of Bristol.....	92
XI. Neutron Total Cross Sections between 30 and 153 mev. By A. E. TAYLOR and E. WOOD, Atomic Energy Research Establishment, Harwell.....	95
XII. Correspondence :—	
A Diffraction Effect illustrating the Transparency of Nuclei to High Energy Neutrons. By J. D. LAWSON, Atomic Energy Research Establishment, Harwell .....	102
A New Parameter for Use in Discussions of the Shell Model of the Nucleus. By N. FEATHER, F.R.S., The University, Edinburgh .....	103
The Surface of Beryl and Cadmium Iodide Crystals. By H. F. KAY and BARBARA APPELBE, H. H. Wills Physical Laboratory, University of Bristol.....	105
XIII. Notices of New Books and Periodicals received :—	
HAROLD C. UREY's <i>The Planets : Their Origin and Development</i> .....	107
G. TINTNER's <i>Econometrics</i> .....	108
C. W. JONES's <i>A Short Table of the Bessel Functions <math>I_{n+\frac{1}{2}}(x)</math>, <math>(2/\pi)K_{n+\frac{1}{2}}(x)</math></i> .....	108
W. HUME-ROTHERY, J. W. CHRISTIAN and W. B. PEARSON's <i>Metallurgical Equilibrium Diagrams</i> .....	108
B. CHALMERS's <i>Progress in Metal Physics</i> .....	108

## NUMBER 349—FEBRUARY

	Page
XIV. The Properties of $\text{KH}_2\text{PO}_4$ Below the Curie Point. By H. M. BARKLA and D. M. FINLAYSON, Department of Natural Philosophy, University of St. Andrews.....	109
XV. Instability and Melting of the Alkali Halides. By J. H. C. THOMPSON, Wadham College, Oxford .....	131
XVI. Helium 3 Reactions in Nuclear Photographic Emulsions. By J. H. FREMLIN, Department of Physics, University of Birmingham....	141
XVII. Commutation Relations in Lagrangian Quantum Mechanics. By W. K. BURTON and B. F. TOUSCHEK, Department of Natural Philosophy, University of Glasgow .....	161
XVIII. On the Polarization of High Energy Bremsstrahlung. By K. PHILLIPS, Metropolitan-Vickers Electrical Co. Ltd., Manchester....	169
XIX. The L Spectra of Nickel and Copper. By Y. CAUCHOIS, Laboratoire de Chimie Physique, Université de Paris.....	173
XX. Note on the Electronic Structure of the Transition Metals. By N. F. MOTT, F.R.S., H. H. Wills Physical Laboratory, University of Bristol.....	187
XXI. The Multiple Scattering of Protons in Thin Foils. By D. M. SKYRME, Atomic Energy Research Establishment, Harwell.....	191
XXII. The Ionic State of LiH. By J. M. BIJVOET, University of Utrecht, and K. LONSDALE, F.R.S., University of London .....	204
XXIII. Correspondence :—	
The Spectrum of the Radiation emitted during $\mu$ -Meson Capture by Carbon. By F. D. S. BUTEMENT, Atomic Energy Research Establishment, Harwell, Berks. ....	208
The Range Energy Relation for Protons of Intermediate Energy in Air. By W. E. BURCHAM, University of Birmingham.....	211
Visual Observations of the Formation of Bulk Liquid from the Helium II Film. By A. C. HAM and L. C. JACKSON, H. H. Wills Physical Laboratory, University of Bristol .....	214
Nuclear Polarization of Cobalt 60. By E. AMBLER, M. A. GRACE, H. HALBAN, N. KURTI, H. DURAND, C. E. JOHNSON and H. R. LEMMER, Clarendon Laboratory, Oxford .....	216
The Use of Stripped Emulsions for Recording the Tracks of Charged Particles. By C. F. POWELL, F.R.S., H. H. Wills Physical Laboratory, University of Bristol .....	219
The Observation of Polyhedral Sub-Structures in Crystals of Silver Bromide. By J. M. HEDGES and J. W. MITCHELL, H. H. Wills Physical Laboratory, University of Bristol .....	223
Evidence for the Direct Production of $\kappa$ -Mesons. By N. ISACHSEN, V. VANGEN and S. O. SÖRENSEN, Fysisk Institute, University of Oslo, Norway.....	224
Comments on Planetary Convection as applied to the Earth. By HAROLD C. UREY, University of Chicago .....	227
XXIV. Notices of New Books and Periodicals Received.....	231

## NUMBER 350—MARCH

	Page
XXV. The Onset of Convection by Thermal Instability in Spherical Shells. By S. CHANDRASEKHAR, F.R.S., Yerkes Observatory, University of Chicago .....	233
XXVI. The Mean Life of Charged $V$ -Particles. By J. P. ASTBURY, J. S. BUCHANAN, P. CHIPPINDALE, D. D. MILLAR, J. A. NEWTH, D. I. PAGE, A. RYTZ and A. B. SAHAR, The Physical Laboratories, The University, Manchester.....	242
XXVII. On the Statistical Estimation of Mean Life-times. By M. S. BARTLETT, University of Manchester .....	249
XXVIII. The Decay in Fluorescence Efficiency of Organic Materials on Irradiation by Particles and Photons. By F. A. BLACK, Department of Natural Philosophy, University of Glasgow .....	263
XXIX. Photo-Electric Determination of the Mass of the Bristol $\kappa_1$ -Meson. By KRISTER KRISTIANSSON, Department of Physics, University of Lund, Sweden .....	268
XXX. The Exchange Energy of Nearly Free Electrons in Metals. By E. P. WOHLFARTH, Department of Mathematics, Imperial College, London .....	281
XXXI. The Electrical Resistivity of Gold at Very Low Temperatures. By A. J. CROFT, E. A. FAULKNER, J. HATTON and E. F. W. SEYMOUR, Clarendon Laboratory, Oxford University .....	289
XXXII. A Study of the Reaction $^{11}\text{B}(\text{d}, \text{n})^{12}\text{C}$ by an Improved Photographic Method. By W. M. GIBSON, H. H. WILLS Physical Laboratory, University of Bristol .....	297
XXXIII. The Cross Section for Star Production in Nuclear Emulsions by 130 mev Protons. By C. F. LEES, G. C. MORRISON, H. MUIRHEAD and W. G. V. ROSSER, Department of Natural Philosophy, University of Glasgow .....	304
XXXIV. An Experimental Study of Radio Reflections from Meteor Trails. By R. L. CROSS, J. A. CLEGG and T. R. KAISER, Jodrell Bank Experimental Station, University of Manchester .....	313
XXXV. Alpha Particles from $^{10}\text{B} + \text{D}$ . By P. B. TREACY, Research School of Physical Sciences, Australian National University, Canberra ..	325
XXXVI. Self Energy of Slow Electrons in Polar Materials. By M. GURARI, Department of Theoretical Physics, University of Liverpool .....	329
XXXVII. A Dislocation Mechanism for the Growth of Hopper Crystal Faces and the Growth of Salol Crystals from Solution and from the Melt. By S. AMELINCKX, Laboratorium voor Kristalkunde, Geologisch Instituut, Rijksuniversiteit Gent Rozier, 6, Ghent (Belgium) .....	337
XXXVIII. The Formation of the Helium Film. By D. F. BREWER and K. MENDELSSOHN, F.R.S., Clarendon Laboratory, Oxford University .....	340
XXXIX. Correspondence :—	
Electromagnetic Radiation from Radium E. By D. G. E. MARTIN and G. PARRY, George Holt Physics Laboratory, Liverpool .....	344
The Virial Theorem in Free Electron and Generalized Thomas-Fermi Models. By N. H. MARCH, Department of Physics, The University, Sheffield.....	346
Delayed Disintegration of a Heavy Nuclear Fragment : I. By M. DANYSZ and J. PNIEWSKI, Institute of Experimental Physics, University of Warsaw.....	348

	Page
Delayed Disintegration of a Heavy Nuclear Fragment: II. By D. A. TIDMAN, G. DAVIS, A. J. HERZ and R. M. TENNENT, Imperial College, London, S.W.7 .....	350
A Neutral $V$ -Particle from a Low-Energy Nuclear Interaction. By J. P. ASTBURY, J. S. BUCHANAN, G. D. JAMES, D. D. MILLAR, J. A. NEWTH, D. I. PAGE, A. B. SAHAR and A. RYTZ, The Physical Laboratories, The University, Manchester 13 .....	352
XL. Notices of New Books and Periodicals received:—	
R. W. DITCHBURN's Light .....	356
J. M. BLATT and V. F. WEISSKOPF's Theoretical Nuclear Physics .....	356

## NUMBER 351—APRIL

XLI. Some Experiments on Photographic Sensitivity. By J. M. HEDGES and J. W. MITCHELL, H. H. Wills Physical Laboratory, Univer- sity of Bristol.....	357
XLII. The Laminar Boundary Layer of a Rotating Body of Revolution. By C. R. ILLINGWORTH, Department of Mathematics, The Univer- sity, Manchester, 13.....	389
XLIII. The Reaction $^{181}\text{Ta}(\gamma, 2n)^{179}\text{Ta}$ at 17.6 mev and Some Remarks on Nuclear Photodisintegration. By J. H. CARVER, R. D. EDGE and D. H. WILKINSON, Cavendish Laboratory, Cambridge.....	404
XLIV. Neutrons Produced by High Energy Protons. By T. C. RANDLE, J. M. CASSELS, T. G. PICKAVANCE and A. E. TAYLOR, Atomic Energy Research Establishment, Harwell.....	425
XLV. The Role of Preferred Orientation in Elasticity Investigations. By G. BRADFELD and H. PURSEY, National Physical Laboratory, Teddington .....	43
XLVI. Anomaly in the Rigidity Modulus of Copper Alloys for Small Concentrations. By J. FRIEDEL, Centre de Recherches Métallurgiques de l'Ecole des Mines de Paris.....	444
XLVII. Correspondence:—	
Bombardment of Ordered $\text{Cu}_3\text{Au}$ by 1 mev Electrons. By C. E. DIXON, C. J. MEECHAN and J. A. BRINKMAN, North American Aviation, Inc., Atomic Energy Research Department, Downey, California.....	449
Radiative Widths of Dipole Transitions in Light Elements. By D. H. WILKINSON, Cavendish Labor- atory, Cambridge .....	450

## NUMBER 352—MAY

XLVIII. The Effect of Small Amounts of Cold-Work on Young's Modulus of Copper. By A. D. N. SMITH, Royal Aircraft Establishment, Farnborough .....	453
XLIX. The Adsorption of Gases at High Saturations—I: The Adsorption of Nitrogen, Argon and Oxygen. By RAYMOND BOWERS, Institute for the Study of Metals, The University of Chicago, Chicago, Illinois .....	467

	Page
L. The Adsorption of Gases at High Saturations—II: The Thickness of the Unsaturated Helium Film. By RAYMOND BOWERS, Institute for the Study of Metals, The University of Chicago, Chicago, Illinois . . . . .	485
LI. On the 'Heating' Resulting from the Absorption of Gamma-Rays at Extremely Low Temperatures. By R. L. PLATZMAN, Purdue University, U.S.A. . . . .	497
LII. On the Use of $\gamma$ -Rays in Low Temperature Colorimetry. By N. KURTI and F. E. SIMON, Clarendon Laboratory, Oxford. . . . .	501
LIII. The Propagation of Very Low Frequency Radio Waves to Great Distances. By K. G. BUDDEN, The Cavendish Laboratory, Cambridge . . . . .	504
LIV. Observations on Slip Found in a Diamond. By S. TOLANSKY and M. OMAR. Royal Holloway College (University of London), Egham, Surrey . . . . .	514
LV. A Surface Contribution to the Debye Specific Heat. By R. STRATTON, University of Manchester . . . . .	519
LVI. On the Existence of Multiple Resonances in the $^{63}\text{Cu}(\gamma, n)^{62}\text{Cu}$ Reaction. By K. PHILLIPS, Research Department, Metropolitan-Vickers Electrical Co. Ltd., Trafford Park, Manchester. . . . .	533
LVII. Isotopic Spin Selection Rules—I: Radiations from $^{16}\text{O}$ . By D. H. WILKINSON and G. A. JONES, Cavendish Laboratory, Cambridge. . . . .	542
LVIII. Bose-Einstein Condensation in Helium Films. By J. M. ZIMAN, Clarendon Laboratory, Oxford. . . . .	548
LIX. Correspondence :—	
Anomalous Surface Tension in Helium II. By D. F. BREWER and K. MENDELSSOHN, F.R.S., The Clarendon Laboratory, Oxford . . . . .	559
Flow of an Inviscid Supersonic Jet past an Infinite Wedge. By D. C. PACK and L. ROBERTS, Department of Mathematics, University of Manchester. . . . .	561
LX. Notices of New Books and Periodicals received :—	
K. E. GREW and T. L. IBBS's Thermal Diffusion in Gases. . . . .	564
L. J. BECK's The Method of Descartes. . . . .	564
W. G. BICKLEY, L. J. COMRIE, J. C. P. MILLER, D. H. SADLER and A. J. THOMPSON's British Association Mathematical Tables, Vol. X, Part 2.—Bessel Functions of Positive Integer Order . . . . .	564

## NUMBER 353—JUNE

LXI. The Penetrating Component of Cosmic Radiation in the Upper Atmosphere. By J. D. PULLAR and E. G. DYMOND, Department of Natural Philosophy, University of Edinburgh. . . . .	565
LXII. Comparison of Equations of State for Amorphous Long-Chain Polymers. By A. CHARLESBY, Atomic Energy Research Establishment, Harwell . . . . .	578
LXIII. The Angular Distribution of Alpha Particles from the Proton Bombardment of $^{18}\text{O}$ . By A. V. COHEN, Cavendish Laboratory, Cambridge . . . . .	583
LXIV. The Bauschinger Effect in some Face-centred and Body-centred Cubic Metals. By R. L. WOOLLEY, Department of Natural Philosophy, St. Andrew's University . . . . .	597

	Page
LXV. Light Pulses from the Night Sky. By J. V. JELLEY and W. GALBRAITH, Atomic Energy Research Establishment, Harwell.....	619
LXVI. Cerium Magnesium Nitrate—I: The Magnetic Properties and Specific Heat above 1°K. By A. H. COOKE, H. J. DUFFUS and W. P. WOLF, The Clarendon Laboratory, Oxford.....	623
LXVII. Cerium Magnesium Nitrate—II: Determination of the Entropy—Absolute Temperature Relation below 1°K. By J. M. DANIELS and F. N. H. ROBINSON, The Clarendon Laboratory, Oxford.....	630
LXVIII. The Specific Heat of Beryllium at Low Temperatures. By R. W. HILL and P. L. SMITH, The Clarendon Laboratory, Oxford.....	636
LXIX. The Thermal and Electrical Conductivities of Beryllium. By R. W. POWELL, National Physical Laboratory, Teddington.....	645
LXX. The Thermal Conductivity of Solid Helium at High Densities. By F. J. WEBB and J. WILKS, The Clarendon Laboratory, Oxford.....	664
LXXI. Notices of New Books and Periodicals received:—	
H. WEYL's Symmetry .....	675
G. K. BATCHELOR's The Theory of Homogeneous Turbulence .....	675
R. C. L. BOSWORTH's Heat Transfer Phenomena; the flow of heat in physical systems .....	676
J. P. STANLEY and M. V. WILKES's Table of the Reciprocal of the Gamma Function for Complex Argument.....	676

## NUMBER 354—JULY

LXXII. Some Thermal Properties of Point-Contact Germanium Diodes. By J. R. TILLMAN and J. C. HENDERSON, Post Office Engineering Research Station, London. ....	677
LXXIII. The Spatial Correlation of Electrons in Atoms and Molecules III: The Influence of Spin and Antisymmetry on the Correlation of Electrons. By A. BRICKSTOCK and J. A. POPLÉ, Department of Theoretical Chemistry, University of Cambridge. ....	697
LXXIV. The Spatial Correlation of Electrons in Atoms and Molecules IV: The Correlation of Electrons on a Spherical Surface. By A. BRICKSTOCK and J. A. POPLÉ, Department of Theoretical Chemistry, University of Cambridge .....	705
LXXV. Collisional Effects and the Conduction Current in an Ionized Gas. By K. C. WESTFOLD, University of Sydney. ....	712
LXXVI. Conditions for the Occurrence of Electrical Discharges in Astrophysical Systems. By J. W. DUNGEY, School of Physics, The University of Sydney, Australia.....	725
LXXVII. The Beta-Gamma Angular Correlation of <sup>76</sup> Arsenic. By H. ROSE, Cavendish Laboratory, Cambridge.....	739
LXXVIII. A Theory of Work-Hardening of Metals. II: Flow Without Slip-Lines, Recovery and Creep. By N. F. MOTT, H. H. WILLS Physical Laboratory, University of Bristol.....	742
LXXIX. Pairing Energy in the j-j Coupling Model. By A. J. M. HITCHCOCK, Cavendish Laboratory, Cambridge.....	766
LXXX. The Electrical Resistivity of Liquid Iron. By R. W. POWELL, Physics Department, National Physical Laboratory, Teddington .....	772
LXXXI. Heat Conductivities of Superconductive Sn, In, Tl, Ta, Cb, and Al below 1°K. By K. MENDELSSOHN, F.R.S. and C. A. RENTON, Clarendon Laboratory, Oxford.....	776

	Page
LXXXII. Correspondence :—	
On the Mutual Transformation of Lattices. By B. A. BILBY, Royal Society Sorby Research Fellow, The University of Sheffield.....	782
On Inverse Perturbation. By A. CUNCLIFFE and R. N. GOULD, University College of Hull.....	785
A Note on the Adsorption of Helium on Glass. By EARL LONG and LOTHAR MEYER, Institute for the Study of Metals, The University of Chicago, U.S.A....	788
Inconsistencies in Adsorption Experiments of Helium II. By D. F. BREWER and K. MENDELSSOHN, F.R.S., The Clarendon Laboratory, Oxford.....	789
The Martensitic Transformation in Cobalt. By Z. S. BASINSKI and J. W. CHRISTIAN, The Inorganic Chemistry Laboratory, Oxford.....	791
LXXXIII. Notices of New Books and Periodicals received :—	
D. SHOENBERG's Superconductivity.....	793
H. KOLSKY's Stress Waves in Solids.....	793
A. L. RIEMANN's Vacuum Technique.....	794
O. R. FRISCH's Progress in Nuclear Physics and Annual Review of Nuclear Science.....	794
O. G. SUTTON's Micrometeorology.....	795

## NUMBER 355—AUGUST

LXXXIV. Cosmic Rays at 60 m.w.e. Underground—I : The Knock-on Electrons and Nuclear Interactions Produced by Relativistic $\mu$ -Mesons. By M. L. T. KANNANGARA and M. ZIVKOVIC, The Physical Laboratories, The University, Manchester .....	797
LXXXV. Cosmic Rays at 60 m.w.e. Underground—II : The Hard and Soft Components. By S. J. GOLDSACK and M. L. T. KANNANGARA, The Physical Laboratories, The University, Manchester.....	811
LXXXVI. A Note on the Portevin-Le Chatelier Effect. By A. H. COTTRELL, Metallurgy Department, University of Birmingham.....	829
LXXXVII. A Study of Individual Radio Atmospherics Received Simultaneously at Two Places. By P. W. A. BOWE, Cavendish Laboratory, Cambridge .....	833
LXXXVIII. The Thermal Etching of Uranium. By B. W. MOTT and J. WILLIAMS, Atomic Energy Research Establishment, Harwell.....	841
LXXXIX. Wave Motion in an Annular Tank. By I. J. CAMPBELL, Admiralty Research Laboratory, Teddington .....	845
XC. On Tin Whiskers. By F. C. FRANK, H. H. Wills Physical Laboratory, University of Bristol .....	854
XCI. The Mass of the $V_1^0$ -Particle. By R. ARMENTEROS, K. H. BARKER, C. C. BUTLER, M. S. COATES and M. G. SOWERBY, The Physical Laboratories, The University, Manchester.....	861
XCII. The Intensity of the Photon Component at 70 000 feet Altitude. By JOHN E. HOOPER, H. H. Wills Physical Laboratory, University of Bristol.....	871
XCIII. Experiments on the Reduction of Crystals of Silver Bromide. By H. D. KEITH and J. W. MITCHELL, H. H. Wills Physical Laboratory, University of Bristol.....	877

	Page
XCIV. The Chain $^{79}\text{As}$ — $^{79m}\text{Se}$ in Slow Neutron Fission of $^{235}\text{U}$ . By J. G. CUNINGHAME, Atomic Energy Research Establishment, Harwell, Didcot, Berks .....	900
XCv. The Valency of the Transition Metals in Some Binary and Ternary Alloys. By H. JONES, F.R.S., Department of Mathematics, Imperial College, London.....	907
XCvI. Correspondence :—	
The Release of the Energy Stored in Deformed Nickel. By L. M. CLAREBROUGH, M. E. HARGREAVES and G. W. WEST, Division of Tribophysics, C.S.I.R.O., Melbourne, Australia.	913
The Electronic Structure of Transition Metals in Alloys. By B. R. COLES, Department of Physics, Imperial College...	915
Resistance-Independent Absorption of Light Waves by Metals, and the Properties of Ideal Conductors. By J. LINDHARD, Institute for Theoretical Physics, Copenhagen .....	916
A Stripping Reaction at Low Bombarding Energy. By L. L. GREEN, J. P. SCANLON and J. C. WILLMOTT, Nuclear Physics Research Laboratory, University of Liverpool....	919
Angular Correlations in the Reaction $^{23}\text{Na}(p, \alpha\gamma)^{20}\text{Ne}$ . By J. SEED, Cavendish Laboratory, Cambridge.....	921
XCvII. Notices of New Books and Periodicals received :—	
S. GLASSSTONE and M. C. EDLUND's Elements of Nuclear Reactor Theory.....	924
Reports on Progress in Physics, Vol. XVI, 1953.....	924

## NUMBER 356—SEPTEMBER

XCvIII. The Growth of Fatigue Cracks. By A. K. HEAD, H. H. Wills Physical Laboratory, University of Bristol, and Aeronautical Research Laboratories, Melbourne .....	925
XCIX. A Model of the Radio-Frequency Radiation from the Galaxy. By R. HANBURY BROWN and C. HAZARD, Jodrell Bank Experimental Station, Cheshire.....	939
C. Oscillator Switching for Variable Frequency Synchrotron Control. By D. E. CARO and L. U. HIBBARD, Department of Physics, University of Birmingham.....	964
CI. A Variational Formulation of the Multi-Stream Electrodynamic Field Equations. By P. N. BUTCHER, Telecommunications Research Establishment, Ministry of Supply, Great Malvern.....	971
CII. The Variation with Distance in the Range 0–100 km of Atmospheric Wave-Forms. By R. B. MORRISON, Sir John Cass College, London, E.C.3.....	980
CIH. A Precision Single-Channel Kicksorter for Coincidence Work. By ERNST BREITENBERGER, Cavendish Laboratory, Cambridge.....	987
CIV. Studies of Continuous Phase Transformations with x-Rays. By E. GILLAM and D. G. COLE, British Iron and Steel Research Association, Battersea, London, S.W.11.....	999
CV. On the Annihilation Spectrum of Positrons in Freon and Oxygen. By G. M. LEWIS and A. T. G. FERGUSON, Department of Natural Philosophy, The University, Glasgow.....	1011

	Page
CVI. Isotopic Spin Selection Rules—II: Electric Dipole Transitions without Change of Isotopic Spin in Nuclei of $T_z = +1$ . By D. H. WILKINSON, Cavendish Laboratory, Cambridge .....	1019
CVII. Energy Dependence of Neutron Total Cross Sections. By F. MANDL and T. H. SKYRME, Atomic Energy Research Establishment, Harwell .....	1028
CVIII. The Determination of the Mass of Energetic Helium Isotopes Emitted in Nuclear Explosions. By T. HOLTEBEKK, N. ISACHSEN and S. O. SÖRENSEN, Fysisk Institutt, University of Oslo .....	1037
CIX. Correspondence :—	
Slip Lines and Etchpits. By S. AMELINCKX, Lab. voor Kristalkunde, Rozier, 6, Gent, Belgium .....	1048
An Unusual $\Omega^0$ -Decay. By D. D. MILLAR and D. I. PAGE, The Physical Laboratories, The University, Manchester 13. ....	1049

## NUMBER 357—OCTOBER

CX. A Study of Charge Exchange by Helium Ions in Metals. By G. A. DISSANAIKE, Cavendish Laboratory, Cambridge .....	1051
CXI. Electrical Interaction of a Dislocation and a Solute Atom. By A. H. COTTRELL, S. C. HUNTER and F. R. N. NABARRO, Department of Metallurgy, University of Birmingham .....	1064
CXII. On the Analysis of $\tau$ -Meson Data and the Nature of the $\tau$ -Meson. By R. H. DALITZ, Department of Mathematical Physics, University of Birmingham .....	1068
CXIII. Low Intensity Lines in the Spectrum of the Gamma-Rays from ${}^7\text{Li}(\text{py}){}^8\text{Be}(\alpha){}^4\text{He}$ . By E. K. INALL and A. J. F. BOYLE, Research School of Physical Sciences, Australian National University, Canberra .....	1081
CXIV. Cosmic Rays at 60 m.w.e. Underground—III: The Anomalous Scattering of $\mu$ -Mesons. By M. L. T. KANNANGARA, The Physical Laboratories, The University, Manchester, and G. S. SHRIKANTIA, Physics Department, Imperial College, London .....	1091
CXV. The Anomalous Scattering of $\mu$ -Mesons in Lead. By B. LEONTIC and A. W. WOLFENDALE, The Physical Laboratories, The University, Manchester .....	1101
CXVI. Nuclear Disintegrations caused by 50–125 mev Protons—I. By P. E. HODGSON, Imperial College of Science and Technology, London, S.W.7 .....	1113
CXVII. A Stochastic Problem Relating to Counters. By ALLADI RAMAKRISHNAN and P. M. MATHEWS, Department of Physics, University of Madras .....	1122
CXVIII. The Onset of Convection by Thermal Instability in Spherical Shells—(A Correction). By S. CHANDRASEKHAR, F.R.S., Yerkes Observatory, University of Chicago .....	1129
CXIX. Spallation of Vanadium, Manganese, and Cobalt with 187 mev Protons. By S. G. RUDSTAM, The Gustaf Werner Institute for Nuclear Chemistry, University of Uppsala, Uppsala, Sweden .....	1131
CXX. Electron Microscopic Observations of 111 Faces of ZnS Crystals. By W. DEKEYSER, S. AMELINCKX, E. VOTAVA and G. VANDERMEERSSCHE, Lab. voor Kristalkunde, Rozier, 6, Centrum voor Electronenmicroscopie, Plateaustraat, 22, Gent, Belgium .....	1142

	Page
CXXI. Experiments on the Deposition of Iodine 131 Vapour onto Surfaces from an Airstream. By A. C. CHAMBERLAIN, Atomic Energy Research Establishment, Harwell.....	1145
CXXII. Metallic Carbides and Nitrides of the Type MX. By WILLIAM HUME-ROTHERY, F.R.S., Inorganic Chemistry Laboratory, Oxford.....	1154
CXXIII. The Dielectric Properties of Barium Titanate Single Crystals in the Region of their Upper Transition Temperature. By L. E. CROSS, Physics Department, The University, Leeds, 2.....	1161
CXXIV. A Note on the Quantum Dynamical Principle. By JULIAN SCHWINGER, Harvard University, Cambridge, U.S.A. ....	1171
CXXV. Schwinger's Dynamical Principle. By W. K. BURTON and B. F. TOUSCHEK, Department of Natural Philosophy, University of Glasgow; Istituto di Fisica, Università degli Studi, Rome.....	1180
CXXVI. Correspondence :—	
Measurement of the Elasticity of Solid Argon by Ultrasonic Methods. By J. R. BARKER, E. R. DOBBS and G. O. JONES, Department of Physics, Queen Mary College, University of London .....	1182
Determination of the Widths of the Levels of $p^{31}$ from the Reaction $^{27}\text{Al}(\alpha, p)^{30}\text{Si}$ . By R. R. ROY and C. GODEAU, Université Libre de Bruxelles, Laboratoire de Physique, Bruxelles .....	1184
Temperature Change in Paramagnetic Resonance Absorption of Solutions of Organic Free Radicals. By D. BIJL and A. C. ROSE-INNES, Clarendon Laboratory, Oxford..	1187
On the Reaction $^{18}\text{O}(p, \alpha)^{15}\text{N}$ . By R. R. ROY, A. LAGASSE and Miss M. J. DECOCK, Université Libre de Bruxelles, Laboratoire de Physique, Bruxelles.....	1189
The Cross Section for $^{181}\text{Ta}(\gamma, n)^{180}\text{Ta}$ at 17.6 mev. By J. H. CARVER and H. J. HAY, Research School of Physical Sciences, Australian National University, Canberra .....	1191
Introduction of Exchange in the Thomas-Fermi Model for Atoms. By N. H. MARCH, Department of Physics, The University, Sheffield .....	1193

## NUMBER 358—NOVEMBER

CXXVII. Nuclear Reactions Produced by the Bombardment of Boron by Low Energy Alpha-Particles. By E. S. SHIRE, J. R. WORMALD, G. LINDSAY-JONES, A. LUNDÉN and A. G. STANLEY, Cavendish Laboratory, Cambridge .....	1197
CXXVIII. Stable Dislocations in the Common Crystal Lattices. By F. C. FRANK, H. H. WILLS Physical Laboratory, University of Bristol and J. F. NICHOLAS, Division of Tribophysics, C.S.I.R.O., Melbourne, Australia	1213
CXXIX. The Surface Free Energy of a Metal—I: Normal State. By R. STRATTON, University of Manchester.....	1236
CXXX. The Surface Free Energy of a Metal—II: Superconducting State. By R. STRATTON, University of Manchester.....	1247
CXXXI. The Angular Distribution of Long-Range Alpha Particles from the Proton Bombardment of $^{15}\text{N}$ . By A. V. COHEN and A. P. FRENCH, Cavendish Laboratory, Cambridge .....	1259

	Page
CXXXII. Isotopic Spin Selection Rules—III: Radiations from $^{14}\text{N}$ . By A. B. CLEGG and D. H. WILKINSON, Cavendish Laboratory, Cambridge	1269
CXXXIII. Dielectric Polarization of a Dipolar Lattice. By J. A. POPLÉ, Department of Theoretical Chemistry, University of Cambridge	1276
CXXXIV. Superconductivity at Very High Pressures. By P. F. CHESTER and G. O. JONES, Queen Mary College, University of London....	1281
CXXXV. A Note on the Range-Scattering Method of Mass Estimation of Ionizing Particles. By M. G. K. MENON and C. O'CEALLAIGH, H. H. Wills Physical Laboratory, University of Bristol.....	1291
CXXXVI. The Decay-in-Flight of a Heavily-Ionizing $\tau$ -Meson. By D. B. GAYTHOR, The Physical Laboratories, The University, Manchester	1297
CXXXVII. Correspondence :—	
Note on a Paper by K. H. Tzou. By J. B. HUGHES, Department of Mathematics, University College of North Wales, Bangor .....	1300
Angular Distributions of Gamma Rays from $^{19}\text{F}$ ( $p, \alpha\gamma$ ) $^{16}\text{O}$ . By J. E. SANDERS, Cavendish Laboratory, Cambridge .....	1302
The Velocities of Fundamental Particles. By L. L. WHYTE .....	1303
The Excitation Function for the Reaction $^9\text{Be}(p, p2n)^7\text{Be}$ . By D. C. SALTER and L. BIRD, Atomic Energy Research Establishment, Harwell, Berks .....	1305
The Angular Distribution of the $\alpha$ -Particles from the $^7\text{Li}(p, \alpha)$ Reaction. By D. K. CARTWRIGHT, L. L. GREEN and J. C. WILLMOTT, University of Liverpool	1307

## NUMBER 359—DECEMBER

CXXXVIII. The Thickness of the Saturated Helium II Film. By RAYMOND BOWERS, Institute for the Study of Metals, University of Chicago.....	1309
CXXXIX. Isotopic Spin Selection Rules—IV: Radiations from $^{20}\text{Ne}$ . By D. H. WILKINSON and A. B. CLEGG, Cavendish Laboratory, Cambridge .....	1322
CXL. The Nuclear Disintegrations Produced by High Energy Protons. By G. C. MORRISON, H. MUIRHEAD and W. G. V. ROSSER, Department of Natural Philosophy, University of Glasgow.....	1326
CXLI. On the Annihilation of Positrons in Solids. By A. T. G. FERGUSON and G. M. LEWIS, Department of Natural Philosophy, The University, Glasgow.....	1339
CXLII. Experiments on Magneto-Hydrodynamic Channel Flow. By W. MURGATROYD, Department of Engineering, University of Cambridge	1348
CXLIII. On Conduction in Impurity Bands. By WALTER BALTENSPERGER, The Physical Laboratories, University of Manchester, England	1355
CXLIV. Thermoelectric Power of Monovalent Metals at High Temperature. By D. K. C. MACDONALD and S. K. ROY, National Research Council, Ottawa .....	1364
CXLV. Nucleation in a Dielectric. By VERA DANIEL and CLARA TURNER, British Electrical Research Association .....	1371

	Page
CXLVI. An x-Ray Examination of an $\alpha$ (Al-Fe-Si) Ternary Compound. By KEITH ROBINSON and P. J. BLACK, Crystallographic Laboratory, Cavendish Laboratory, Cambridge .....	1392
CXLVII. The Inelastic Scattering of Neutrons: II. By M. J. POOLE, Atomic Energy Research Establishment, Harwell, Berks.....	1398
CXLVIII. A Method for the Determination of the Rate of Extension of the Helium II Film. By A. C. HAM and L. C. JACKSON, H. H. Wills Physical Laboratory, University of Bristol .....	1403
CXLIX. Correspondence :—	
Estimation of Mean Lifetimes from Multiplate Cloud Chamber Tracks. By M. S. BARTLETT, University of Manchester .....	1407
Crystallographic Slip in Diamond. By M. SEAL and J. W. MENTER, Research Laboratory for the Physics and Chemistry of Surfaces, Department of Physical Chemistry, University of Cambridge.....	1408
CL. Notices of New Books and Periodicals received :—	
R. A. LYTTLETON's The Stability of Rotating Liquid Masses.....	1411
S. C. CURRAN's Luminescence and the Scintillation Counter.....	1411
G. B. COOK and J. F. DUNCAN's Modern Radiochemical Practice .....	1412
E. J. BOWEN and F. WOKES's Fluorescence of Solutions .....	1412
Index to Volume .....	1413

## P L A T E S

- 1 & 2. Illustrative of H. F. KAY and BARBARA APPELBE'S Correspondence on the Surface of Beryl and Cadmium Iodide Crystals.
- 3 & 4. Illustrative of J. H. FREMLIN'S Paper on Helium 3 Reactions in Nuclear Photographic Emulsions.
- 5 & 6. Illustrative of Y. CAUCHOIS'S Paper on the L Spectra of Nickel and Copper.
- 7 & 8. Illustrative of J. M. HEDGES and J. W. MITCHELL'S Correspondence on the Observation of Polyhedral Sub-Structures in Crystals of Silver Bromide.
9. Illustrative of N. ISACHSEN, V. VANGEN and S. O. SÖRENSEN'S Correspondence on Evidence for the Direct Production of  $\kappa$ -Mesons.
- 10 & 11. Illustrative of J. P. ASTBURY, J. S. BUCHANAN, P. CHIPPINDALE, D. D. MILLAR, J. A. NEWTH, D. I. PAGE, A. RYTZ and A. B. SAHAR'S Paper on the Mean Life of Charged V-Particles.
12. Illustrative of S. AMELINCKX'S Paper on a Dislocation Mechanism for the Growth of Hopper Crystal Faces and the Growth of Salol Crystals from Solution and from the Melt.
13. Illustrative of M. DANYSZ and J. PNIEMSKI'S Correspondence on Delayed Disintegration of a Heavy Nuclear Fragment : I.
- 14 & 15. Illustrative of D. A. TIDMAN, G. DAVIS, A. J. HERZ and R. M. TENNENT'S Correspondence on Delayed Disintegration of a Heavy Nuclear Fragment : II.
16. Illustrative of J. P. ASTBURY, J. S. BUCHANAN, G. D. JAMES, D. D. MILLAR, J. A. NEWTH, D. I. PAGE, A. B. SAHAR and A. RYTZ'S Correspondence on a Neutral V-Particle from a Low-Energy Nuclear Interaction.
- 17-28. Illustrative of J. M. HEDGES and J. W. MITCHELL'S Paper on Some Experiments on Photographic Sensitivity.
29. Illustrative of S. TOLANSKY and M. OMAR'S Paper on Observations on Slip Found in a Diamond.
30. Illustrative of B. W. MOTT and J. WILLIAMS'S Paper on the Thermal Etching of Uranium.
31. Illustrative of I. J. CAMPBELL'S Paper on Wave Motion in an Annular Tank.
- 32-39. Illustrative of H. D. KEITH and J. W. MITCHELL'S Paper on Experiments on the Reduction of Crystals of Silver Bromide.
- 40 & 41. Illustrative of R. B. MORRISON'S Paper on the Variation with Distance in the Range 0-100 km of Atmospheric Wave-Forms.
42. Illustrative of S. AMELINCKX'S Correspondence on Slip Lines and Etchpits.
43. Illustrative of D. D. MILLAR and D. I. PAGE'S Correspondence on an Unusual  $\Omega^0$ -Decay.
- 44 & 45. Illustrative of B. LEONTIC and A. W. WOLFENDALE'S Paper on the Anomalous Scattering of  $\mu$ -Mesons in Lead.
- 46 & 47. Illustrative of W. DEKEYSER, S. AMELINCKX, E. VOTAVA and G. VANDERMEERSSCHE'S Paper on Electron Microscopic Observations of 111 Faces of ZnS Crystals.
48. Illustrative of A. C. CHAMBERLAIN'S Paper on Experiments on the Deposition of Iodine 131 Vapour onto Surfaces from an Airstream.

49. Illustrative of R. R. ROY and C. GODEAU'S Correspondence on Determination of the Widths of the Levels of  $p^{31}$  from the Reaction  $^{27}\text{Al}(\alpha, p)^{30}\text{Si}$ .
50. Illustrative of D. BIJL and A. C. ROSE-INNES'S Correspondence on Temperature Change in Paramagnetic Resonance Absorption of Solutions of Organic Free Radicals.
51. Illustrative of D. B. GAYTHER'S Paper on the Decay-in-Flight of a Heavily-Ionizing  $\tau$ -Meson.
52. Illustrative of M. SEAL and J. W. MENTER'S Correspondence on Crystallographic Slip in Diamond.
